EDUCATION

New York University

B.A. Computer Science, minor in Business Studies – College of Arts and Sciences

Relevant Coursework: Management & Organizations (Stern), Introduction to Microeconomics, Data Structures, Basic Algorithms, Discrete Mathematics

New York, NY

May 2028

Harvard-Westlake School

California Mock Trial MVP Award

Los Angeles, CA

Jun 2024

EXPERIENCE

Ticketmaster

Software Engineering Intern, Demand Team – Artist Presale & Internal Tools

New York, NY

Summer 2025

- Rebuilt a promoter-facing React/Next.js tool with a cross-functional team; shipped to production for use across the Demand organization.
- Built a worker service sending **200K+** SMS notifications/day across artist presale timelines, using MongoDB and AWS to reach the right users at the right time.
- Contributed to Agile delivery through pull requests, code review, testing, and CI/CD workflows; improved internal-tool reliability with structured error handling and Jest tests.

depicto.ai

Co-Founder – AI-Powered Puzzle Game

Los Angeles, CA

2022 – 2024

- Co-founded an AI-assisted puzzle game and grew it to **1,000+** players, owning product decisions from game mechanics to difficulty progression.
- Reached **48%** day-30 retention (6× industry average) by using player-behavior data to prioritize and iterate on core mechanics.
- Managed a software engineer and led architecture across a React/TypeScript codebase—implementing client-side state management, async asset loading, and event-driven difficulty scaling—to lift session length and repeat play.

nsilico.net

Co-Founder – AI-Powered Survey Response Generator

New York, NY

2024 – 2025

- Identified a use case for synthetic survey personas and shipped a Next.js/Firebase MVP in **under two months**, validating output with real users.
- Owned the product end to end: MVP scoping, prompt design, full-stack implementation, and iteration driven by user feedback.

NYU Office of Undergraduate Admissions

Admissions Ambassador

New York, NY

Nov 2025 – Present

- Marketed NYU's differentiated value proposition to prospective students and parents by leading **6+** weekly tours, panels, and events.
- Enhanced communications and digital operations, driving **262,000** impressions across NYU platforms (TikTok, Instagram, MEETNYU website, and U.S. News ranking) and contributing to an **88%** show rate at the admitted-students welcome weekend.

Harvard-Westlake Inc.

Director – Summer Business Bootcamp

Los Angeles, CA

2021 – 2024

- Directed a student-run summer business program for **80+** participants, teaching MVP development and product-market fit while managing a **\$76K** budget.
- Designed and led the curriculum around lean-startup methodology, guiding participant teams from ideation through a final pitch to a panel of judges.

PROJECTS

Debate – Live Audio Debate Platform

2025 – Present

Expo · React Native · Supabase · LiveKit · Real-Time Data

- Owned the product model, technical architecture, and roadmap, translating a reusable-question framework into live debate rooms across mobile and backend.
- Engineered the platform using Expo/React Native, Supabase, and LiveKit, integrating real-time voting data, chat, social follows, and live audio sessions.
- Implemented audience-feedback collection through live voting and built engagement touchpoints through activity notifications and an in-app inbox, incorporating moderation into core workflows.

Emotional Shopping – AI Product Recommendations

2024

React · Face-api.js · Tailwind CSS

- Prototyped a React recommendation demo using Face-api.js to read facial expressions and update the product catalogue as detected emotions change.
- Designed the emotion-to-category mapping and ran model inference asynchronously to keep catalogue updates smooth during continuous detection.

Git – Java VCS Implementation

2024

Java · Content-Addressed Storage

- Implemented core Git internals in Java (object storage, commits, branching, merge) to understand version control from first principles.
- Built a content-addressable object store with SHA-1 hashing and a commit graph supporting branch divergence and three-way merges.

SKILLS

- **Program & Product:** Roadmapping, MVP Scoping, User Research, Data-Informed Iteration, Cross-Functional Collaboration, Agile Delivery, Figma Prototyping
- **Technical:** JavaScript/TypeScript, Python, SQL, React/Next.js, Node.js, REST/GraphQL APIs, PostgreSQL, AWS, Git
- **Business:** Microeconomics, Management & Organizational Strategy, Product-Market Fit
- **Interests:** Intermediate Japanese, Video editing/Adobe Suite, Movies, Piano
