EDUCATION

New York University

B.A. Computer Science & Minor in Business Studies – College of Arts and Sciences

New York, NY

May 2028

Relevant Coursework: Management & Organizations (Stern), Introduction to Microeconomics, Data Structures, Basic Algorithms, Discrete Mathematics, Computer Networking, Applied Internet Technology, Principles of Programming Languages, Design and Data Structures

Harvard-Westlake School

High School Diploma

Los Angeles, CA

Jun 2024

Awards: California Mock Trial MVP Award, Honor Roll, Track and Field Team Leadership Award

EXPERIENCE

Ticketmaster

Software Engineering Intern, Demand Team – Artist Presale & Internal Tools

New York, NY

May 2025-August 2025

- Partnered with a cross-functional team to rebuild and launch a promoter-facing **React/Next.js platform**, contributing to application development and production rollout to support promoter workflows and deliver an operational tool across the demand organizations.
- Improved internal-tool reliability and supported production readiness by implementing structured error handling and Jest automated tests, integrating changes through pull requests, peer code reviews, and CI/CD workflows within cross-functional Agile delivery cycles.
- Drove delivery of an **AWS- and MongoDB-backed notification service**, translating artist presale schedules and audience-targeting needs into automated outreach delivering **200K+ SMS notifications daily** to connect users with personalized ticketing opportunities.

Depicto.ai

Co-Founder – AI-Powered Puzzle Game

Los Angeles, CA

2022 – 2024

- Co-founded and scaled an AI-assisted puzzle game to **1,000+ players**, owning game mechanics and difficulty progression; launched streaks, progressive hints, and a custom keyboard interface, increasing weekly retention by **46%** and games played per user by **72%**.
- Managed a software engineer through detailed meetings, scoping out features based on player data and internal metrics. Managed communication between investors and developers, optimizing for quick development and interaction while trying to grow the user base.
- Reached **48%** day-30 retention (6× industry benchmark) by using player-behavior data to prioritize and iterate on core mechanics.

Nsilico.net

Co-Founder – AI-Powered Survey Response Generator

New York, NY

2024 – 2025

- Identified a use case for **AI-generated survey personas** and shipped a **Next.js/Firebase MVP in under two months**, translating the concept into a functional prototype and validating generated responses with real users to assess output relevance and practical usability.
- Owned **end-to-end product development** across MVP scoping, prompt engineering, and full-stack implementation, translating user feedback into prioritized product iterations and refining persona outputs and interaction flows to better address user needs.

NYU Office of Undergraduate Admissions

Admissions Ambassador

New York, NY

Nov 2025 – Present

- Marketed NYU's differentiated value proposition to prospective students and parents by leading **6+** weekly tours, panels, and events.
- Enhanced communications and digital operations, driving **262,000** impressions across NYU platforms (TikTok, Instagram, MEETNYU website, and U.S. News ranking) and contributing to an **88%** show rate at the admitted-students welcome weekend.

Harvard-Westlake Inc.

Director – Summer Business Bootcamp

Los Angeles, CA

2021 – 2024

- Co-led a fully student-run summer business camp from the ground up with a team of **11** peers, doubling enrollment from **40 to 80** participants by leading marketing, applications, and pricing while managing a **\$76K** budget.
- Led program delivery end-to-end. Built teaching decks, ran instructional sessions, managed participant teams, coordinated daily catering for **200+** attendees, and operated a live camera for final pitch presentations.

PROJECTS

Debate – Live Audio Debate Platform | Github

2025 – Present

Expo · React Native · Supabase · LiveKit · Real-Time Data

- Owned **product strategy, architecture, and MVP delivery** for a live debate platform, translating reusable prompts into a **full-stack Expo/React Native app** with **Supabase backend services and LiveKit real-time audio**.
- Engineered the platform using Expo/React Native, Supabase, and LiveKit, integrating real-time voting data, chat, social follows, and live audio sessions.
- Implemented audience-feedback collection through live voting and built engagement touchpoints through activity notifications and an in-app inbox, incorporating moderation into core workflows.

Emotional Shopping – AI Product Recommendations | Live site

2024

React · Face-api.js · Tailwind CSS

- Prototyped a React recommendation demo using Face-api.js to read facial expressions and update the product catalogue as detected emotions change.
- Designed the emotion-to-category mapping and ran model inference asynchronously to keep catalogue updates smooth during continuous detection.

Java VCS Implementation | Github

2024

Java · Content-Addressed Storage

- Implemented core Git internals in Java (object storage, commits, branching, merge) to understand version control from first principles.
- Built a content-addressable object store with SHA-1 hashing and a commit graph supporting branch divergence and three-way merges.

SKILLS

- Program & Product:** Roadmapping, MVP Scoping, User Research, Data-Informed Iteration, Cross-Functional Collaboration, Agile Delivery, Figma Prototyping
- Technical:** JavaScript/TypeScript, Python, SQL, React/Next.js, Node.js, REST/GraphQL APIs, PostgreSQL, AWS, Git
- Business:** Microeconomics, Management & Organizational Strategy, Product-Market Fit
- Interests:** Intermediate Japanese, Video editing/Adobe Suite, Movies, Piano
